

I rise up in strong support of comments previously filed by the National Association of Amateur Radio, (ARRL), The Upper New York Repeater Council Inc., and others who have voiced strong valid opposition to this proposed rule making change. Petitioner has failed to demonstrate that such changes will not increase the interference potential to licensed users of the spectrum therefore the Commission has no alternative other than to dismiss petitioner's request in its entirety, and I respectfully urge the Commission to do so forthwith. Respectfully submitted by a licensed spectrum user,
L. Frink, amateur licensee K2KJ
